## Special Issue

## Catheter Ablation for Cardiac Arrhythmias: Clinical Updates and Perspectives in Cardiac Electrophysiology

### Message from the Guest Editors

Cardiac electrophysiology is a rapidly evolving field. Today, catheter ablation stands as the first-line therapy for many cardiac arrhythmias, such as AV node reentry tachycardia, typical and atypical atrial flutter, and atrial fibrillation. Pulmonary vein isolation (PVI) is the most frequently performed ablation procedure in cardiac electrophysiology and a pivotal strategy in the rhythm management of atrial fibrillation patients. Over the past decades, various thermal and non-thermal modalities for cardiac catheter ablation have emerged. These include 3D mapping-integrated point-by-point radiofrequency ablation, single-shot cryoballoon PVI, and pulsed-field ablation. Additionally, ablation procedures for premature ventricular contractions (PVCs) and ventricular tachycardia (VT) have significantly improved outcomes for these complex arrhythmias. With a deeper understanding of arrhythmic substrates, modulators, and triggers, substrate-based ablation is gaining increasing attention. This Special Issue aims to provide clinical updates and perspectives on the rapidly evolving cardiac arrhythmia catheter ablation field.

### **About the Journal**

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
