Innovations in Maxillofacial Surgery

Message from the Guest Editors

As maxillofacial surgery continues to advance, the integration of innovative techniques and technologies is reshaping the future of patient care. We invite scholars to submit original articles and reviews for our upcoming issue.

This Special Issue focuses on the latest advances and emerging technologies in the field. We are particularly interested, but not limited to the following:

Advanced surgical techniques: innovative approaches to facial trauma, reconstruction, orthognathic surgery, and aesthetic procedures.

Digital surgery and 3D technologies: the role of virtual planning, computer-aided design, and 3D printing in enhancing surgical precision and outcomes.

Regenerative medicine: new materials and biological therapies for bone regeneration and soft tissue healing.

Oncology and reconstruction: advances in the surgical management of maxillofacial tumors and novel reconstruction techniques.

Sleep apnea and orthognathic surgery: surgical interventions in obstructive sleep apnea, focusing on orthognathic surgery and airway improvement.

Minimally invasive surgery: exploring new tools and techniques that reduce patient morbidity and recovery time.
