

Special Issue

Novel Insights into Clinical Diagnosis and Management of Degenerative Cervical Myelopathy

Message from the Guest Editors

This Special Issue aims to publish high-quality research articles and reviews that advance our understanding of the diagnosis and management of DCM. The focus will be on novel insights and innovative approaches that improve patient outcomes. In this Special Issue, we welcome original research articles and reviews.

- Novel diagnostic approaches:

- Advanced imaging techniques (e.g., high-resolution MRI, diffusion tensor imaging, and dynamic MRI);
- Biomarkers for early detection and disease progression;
- Clinical prediction rules for improved diagnostic accuracy.

- Surgical interventions:

- Minimally invasive surgical techniques;
- Novel instrumentation and technologies;
- Post-operative rehabilitation strategies.

- Non-surgical management:

- Medical management (e.g., pain management, medications);
- Physical therapy and rehabilitation interventions;
- Complementary and alternative therapies.

- Epidemiology, classification, and clinical outcomes:

- Long-term outcomes of surgical and non-surgical interventions;
- Quality of life assessment in patients with DCM;
