

## Special Issue

# Advances and Updates in Migraine

### Message from the Guest Editors

Migraine is the most prominent headache disorder and ranks third among all diseases worldwide, affecting nearly 15% of the global population annually. It is most prevalent in women aged 30 to 40 and is more common than diabetes, asthma, and epilepsy combined. Chronic migraine alone impacts approximately 2% of the world's population. The WHO lists migraine as the leading cause of disability under the age of 50, especially in women. Headache disorders account for over 75% of all years lived with disability due to neurological diseases—surpassing stroke, dementia, Parkinson's disease, multiple sclerosis, and epilepsy. This Special Issue aims to highlight cutting-edge advances in migraine research, diagnosis, and treatment. We look forward to your valuable contributions.

### Guest Editors

Prof. Dr. Hartmut Göbel

Kiel Migraine and Headache Center, 24149 Kiel, Germany

Dr. Carl H. Göbel

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
