Clinical Research on Minimally Invasive Spine Surgery

Message from the Guest Editor

We invite you to participate in this Special Issue of *JCM* on “Clinical Research in Minimally Invasive Spine Surgery.” As you are aware, there are many potential advantages to minimally invasive spine surgery when compared to traditional open spine surgery.

Although minimally invasive spine surgery is frequently utilized for degenerative disease of the spine, and we welcome submissions regarding this topic, we are also eager to learn more about the role of minimally invasive spine surgery in spinal trauma, spinal oncology, pathological fractures, and even infectious processes. If you have clinical data or research regarding the use of minimally invasive spine surgery regarding any of these topics please consider sharing your findings and insight with your colleagues.

We look forward to receiving your submissions to this Special Issue.

Cordially,

Guest Editor

Dr. Daniel K. Fahim

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s
