Clinical Advances in Cardiac Imaging

Message from the Guest Editor

I would like to invite you to contribute to the upcoming Special Issue, "Clinical Advances in Cardiac Imaging". The aim of this Special Issue is to explore new technological developments in the field of modern cardiac imaging, encompassing non-invasive imaging methods such as echocardiography, MRI, CT, SPECT, and PET. All types of studies, including original articles and reviews, are welcome. This Special Issue will focus mainly on improvements in the early detection, faster diagnosis, and better management of cardiovascular diseases. Core challenges include the need for improvement in diagnostic accuracy, the limitation of side effects, the time and/or costs of testing, new applications for the integration of imaging modalities, and improving accuracy in the interpretation of imaging results.
