Advances in Chronic Pain Research and Therapy

Message from the Guest Editor

The field of brain-body interactions in pain and their therapeutic interventions has made remarkable progress in recent years. Various pain conditions, previously difficult to manage or understand in a holistic context, are now being explored through an integrated approach that considers both the physiological and psychological aspects of pain. A key aspect of this interaction is interoception—the brain's ability to perceive and process internal bodily sensations. This awareness of internal bodily states influences emotional responses, pain perception, and can impact therapeutic effectiveness. The consequent development of mind-body interventions has opened new possibilities for managing chronic pain. In this Special Issue, we invite authors to submit papers exploring the clinical advances in understanding brain-body interactions in pain. We also welcome research on the application and effectiveness of mind-body interventions that target both the physiological and emotional components of pain through integrated and innovative approaches.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
