

Special Issue

Pediatric Dentistry—Clinical Updates

Message from the Guest Editor

Pediatric dentistry aims to encompass all aspects of children's oral health in a comprehensive way. Environment, diet, general health, medication, and lifestyle are all factors that need to be studied when it comes to major oral problems such as early childhood caries or molar incisor hypomineralization. Developmental defects of enamel continue to challenge researchers in their search for risk factors, and clinicians in their management of their complications. New approaches, such as noninvasive dentistry, have shifted certain paradigms. The introduction of cameras and digital technologies has changed procedures in orthodontics, for instance. The management of children with special needs is still a challenge for practitioners and a major public health issue. We therefore require an update on new evidence on early exposures, childhood oral health and its care, and children's later health. This Special Issue addresses the new challenges of children's oral health as part of global health and aims to highlight recent advances in clinical practice in pediatric dentistry.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
