Current Trends and Innovations in Arthroscopic Shoulder Surgery

Message from the Guest Editors

Over the past two decades, reconstructive procedures of the shoulder and adjacent joints have become increasingly popular worldwide and are currently predominantly carried out arthroscopically or via minimally invasive procedures. The focus of rotator cuff surgery has primarily been on biomechanical and clinical studies that have examined the value of various reattachment techniques. Despite the establishment of highly stable constructs, clinical outcomes have not improved significantly. New approaches exist primarily in the joint-preserving treatment of irreparable or partially repairable ruptures. Different superior capsular reconstruction techniques and modern muscle transfer options to replace or augment the insufficient musculotendinous units of the rotator cuff are currently being tested in clinical research and are increasingly transitioning to clinical practice. The aim of this Special Issue is to give you an overview of established approaches and current innovations in reconstructive shoulder surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
