Female Infertility: Clinical Diagnosis and Treatment

Message from the Guest Editor

Advancements in the diagnosis and treatment of female infertility over the past few decades have been truly remarkable. Innovations such as exploring the endometrial microbiome, genetic screening, and diagnosing conditions like endometriosis via micro-RNA are transforming the field. Additionally, emerging techniques for the prediction of the embryo with the best implantation potential, regardless of its morphological development, and the improvement of sperm selection are enhancing pregnancy success rates. Cutting-edge approaches like preimplantation genetic testing and advanced sperm selection methods promise significant clinical improvements. Integrating these new technologies and methods into treatment protocols offers unprecedented opportunities for couples facing reproductive challenges. For this Special Issue, we invite authors to submit articles on these revolutionary clinical advances, contributing to the future of reproductive medicine by helping to develop new strategies that continually improve infertility care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
