Bariatric Surgery: Current Status and Emerging Clinical Trends

Message from the Guest Editor

Over the past two decades, bariatric and metabolic surgery has transformed from a weight-loss procedure into a cornerstone of comprehensive metabolic disease management. Rapid advancements in minimally invasive techniques, robotic technology, and enhanced recovery pathways have improved safety and outcomes, while emerging pharmacologic therapies—particularly GLP-1 receptor agonists and dual/triple incretin agents—are redefining surgical indications and postoperative care. While these burgeoning technological and innovative approaches may be viewed as challenges, they also represent a new landscape of therapeutic interventions. We are pleased to invite you to contribute to this Special Issue, “Bariatric Surgery: Current Status and Emerging Clinical Trends,” which will explore the intersection of innovation, evidence, and patient-centered outcomes in modern bariatric practice. This collection aims to provide an updated synthesis of global trends, novel procedures, metabolic mechanisms, and combination therapies that are shaping the future of obesity and metabolic surgery. We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
