Diagnosis, Treatment and Prognosis of Head and Neck Cancer

Message from the Guest Editors

Head and neck cancer (HNC) comprises a biologically diverse group of malignancies, presenting complex diagnostic and therapeutic challenges. Recent advances in molecular profiling, imaging technologies, and minimally invasive surgical and therapeutic techniques are transforming the clinical landscape, allowing for more precise and personalized care. Early detection and accurate staging are critical to improving outcomes, while functional preservation and quality of life are increasingly prioritized treatment objectives. This Special Issue aims to showcase current evidence and emerging perspectives related to the diagnosis, treatment, and prognosis of HNC. In this Special Issue, original research articles and reviews are welcome. Topics of interest may include (but are not limited to) the following:

- Innovations in surgical and non-surgical management;
- Biomarkers for risk stratification and therapeutic response;
- Strategies for surveillance and survivorship care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
