

Special Issue

Prevention, Diagnosis, and Clinical Treatment of Corneal Diseases

Message from the Guest Editors

Corneal diseases remain a leading cause of visual impairment worldwide, encompassing a wide spectrum of conditions including infections, dystrophies, and trauma.

This Special Issue will provide a comprehensive overview of current advances and future directions in the prevention, diagnosis, and clinical management of corneal disorders.

Recent innovations in imaging technologies, have significantly enhanced our ability to detect and monitor corneal pathology with greater precision. At the same time, the integration of molecular diagnostics and artificial intelligence is opening up new avenues for early disease detection and personalized care.

On the therapeutic front, evolving medical and surgical interventions—including topical immunomodulators, lamellar keratoplasty, and regenerative therapies—are reshaping the clinical landscape.

Finally, the availability of donated corneas—facilitated by the efforts of eye banks—is essential in successful transplantation and ensuring access to corneal tissue. Contributions to this Special Issue should highlight both established and emerging treatment paradigms, with a focus on evidence-based approaches and patient-centered outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
