# Endodontic Diseases: Prevalence, Risk Factors, and Treatment Outcomes

### Message from the Guest Editors

Endodontic therapy has undergone significant transformations over the last decades, evolving from traditional methods to incorporate advanced diagnostic tools and treatment options. However, it remains unclear whether this evolution has influenced the healing rate of endodontic disease. Systemic diseases (e.g., diabetes, MRONJ) may influence periapical health, warranting further study. While CBCT improves diagnostics, it may reveal previously undetected pathologies, altering perceived disease prevalence. Vital pulp therapy, utilizing new bioceramic materials, has enabled the preservation of tooth vitality in cases previously considered for root canal treatment. Regenerative endodontic therapies for immature and mature teeth have emerged as a novel alternative for traditional endodontic therapy. Nevertheless, a thorough understanding of long-term treatment outcomes, especially in comparison to traditional treatment options, remains lacking. As we strive for innovation in this field, we encourage researchers to submit related papers for publication in the Journal of Clinical Medicine MDPI.

### Guest Editors

Dr. Iris Slutzky-Goldberg  
Prof. Dr. Shlomo Matalon  
Dr. Hagay Slutzky

### Deadline for manuscript submissions

closed (31 March 2026)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
