

## Special Issue

# Cerebral Palsy: Pediatric Patient- and Family-Centered Care and Clinical Research

### Message from the Guest Editor

Cerebral palsy (CP) is the most common physical disability that originates in childhood and affects the lifespan; it is NOT a terminal illness and cannot be treated as such. To change paradigms of CP care from addressing a single problem at one point in time towards managing a chronic condition over a lifetime trajectory, we need to rethink care delivery systems and research design. Beyond their role in the ICF, environment and personal factors must become critical components of systems change processes, habilitative technologies and strategies. Managing CP over the lifespan starts in childhood, with a goal of stakeholder health and empowerment. We invite you to contribute to this Special Issue, which aims to collate the latest evidence on clinical care, implementation science and research, for infants, children, and adolescents with cerebral palsy with a focus on "stakeholder-centered interventions and health promotion".

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
