Interventional Treatment of Coronary Artery Disease: Clinical Insights and Current Practice

Message from the Guest Editor

Coronary artery disease (CAD) remains the leading cause of morbidity and mortality worldwide. In recent years, interventional cardiology has undergone profound evolution, driven by advances in stent technology, intracoronary imaging, physiology-guided strategies and optimization of pharmacological therapy. These developments aim to improve clinical outcomes in an increasingly complex patient population, characterized by older age and more advanced coronary artery disease. This Special Issue aims to provide a clinically oriented update on contemporary coronary intervention, focusing on patient selection, procedural optimization, and long-term outcomes. Particular emphasis will be placed on translating randomized trial data and real-world evidence into daily clinical practice. We welcome contributions that address practical challenges and emerging paradigms in the management of patients undergoing percutaneous coronary intervention (PCI). We look forward to your valuable contributions and to collectively shaping the future of coronary intervention.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
