

Special Issue

Recent Advances and Future Perspective of Subarachnoid Hemorrhage

Message from the Guest Editor

The Special Issue “Recent Advances and Future Perspectives in Subarachnoid Hemorrhage” captures a field in transition: from primarily focusing on securing the aneurysm and preventing vasospasm, toward a more holistic, early-brain-injury-aware, personalized management paradigm. While substantial progress has been made in monitoring, intervention, and understanding pathophysiology, the definitive improvement in functional outcomes remains a work in progress. The coming years promise deeper integration of multi-modal monitoring, biomarker-guided therapy, advanced technologies and robust clinical trials – aiming to reduce the devastating impact of SAH on patients and their families. Aim and scope: The Special Issue sets out to pull together advances in monitoring, treatment, and outcome improvement for SAH, and to identify future perspectives. Key topics include neuromonitoring, pharmacological or interventional treatments of complications (particularly DCI), preventative strategies, and emerging technologies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
