

Special Issue

Strategies in Complex Hand Trauma: Bridging Orthopedics, Plastic Surgery and Rehabilitation

Message from the Guest Editors

Complex hand trauma remains a major therapeutic challenge that demands a multidisciplinary and patient-specific approach. This Special Issue gathers contributions from leading experts in orthopedics, plastic and reconstructive surgery, and rehabilitation, with the objective of offering a comprehensive and up-to-date overview of the most effective diagnostic, surgical, and functional strategies. The topics addressed include bone and tendon reconstruction, soft-tissue coverage, advanced microsurgical techniques, and early, individualized rehabilitation programs aimed at maximizing functional recovery and promoting patients' reintegration into daily life and occupational activities. Particular emphasis is placed on the importance of interdisciplinary collaboration, which has emerged as a cornerstone in improving clinical outcomes and enhancing quality of life for patients with severe hand injuries.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
