Biomarkers and Diagnostics in Neurological Diseases

Message from the Guest Editor

Over the past decade, significant progress has been achieved in implementing novel biomarkers for diagnosing neurological diseases. This Special Issue highlights current research and fosters discussions on the evolving role of biomarkers in neurological diseases. Topics of interest include diagnostic biomarkers across neuroimaging, neurophysiology, serology, and cerebrospinal fluid (CSF) domains. Examples encompass the following: (i) Established serum and CSF biomarkers;

(ii) Emerging biomarkers for differential diagnosis and treatment monitoring in neurodegenerative and neuroimmunological disorders;

(iii) Lipoprotein(a) as a cerebrovascular biomarker for intracranial and extracranial atherosclerosis;

(iv) Inflammatory cytokines, Schwann cell-specific proteins, and microRNAs for peripheral neuropathies;

(v) Neuroimaging biomarkers, including amyloid PET, tau PET, and advanced modalities like spectroscopy;

(vi) Translational neurophysiological biomarkers;

(vii) Artificial intelligence (AI) applications for identifying reliable neurological biomarkers. This Special Issue aims to advance understanding and clarify the clinical utility of biomarkers in neurology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
