Technological Advancements and Clinical Innovations in Diagnostic and Interventional Radiology

Message from the Guest Editors

Technological advancements continue to play a crucial role in the evolution of diagnostic and interventional radiology, and in clinical practice. Most recent innovations could rapidly give birth to newer and more modern diagnostic and interventional radiological guidelines. Artificial intelligence, radiomics, augmented reality, innovative imaging technologies (spectral CT, functional MRI), new reconstruction software, fusion imaging, new contrast agents (CO₂) to minimize the nephrotoxicity of iodinated contrast agents in endovascular procedures, innovative guidance systems and new combined approaches using technologically advanced devices (micro-balloons) in interventional oncology are just some of the topics that will be highlighted in this Special Issue. We welcome the submission of papers addressing technological advancements and innovations in diagnostic, interventional and experimental radiology capable of changing clinical practice (as well as preclinical activity with translational perspectives) authored by expert radiologists. We welcome authors to submit papers on technological advancements and innovations in diagnostic and interventional radiology for this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
