Pancreatic Cancer: Novel Strategies of Diagnosis and Treatment

Message from the Guest Editors

Pancreatic cancer is widely recognized as a highly aggressive form of cancer, exhibiting a 5-year survival rate of approximately 10%. The unfavorable prognosis primarily stems from delayed diagnosis during therapeutically advanced stages, as well as the poor success rate of oncological treatments. To date, a number of proteomic biomarkers, free-cell DNA, and microRNA have exhibited encouraging outcomes. The connection between molecular marker values and clinical characteristics could help find biomarkers that can effectively identify people who are more likely to suffer from pancreatic cancer. This would enable the application of screening strategies in these groups. The primary focus of this Special Issue is to increase the clinical focus on the pathogenesis of pancreatic cancer in order to achieve progress in innovative diagnostic and treatment strategies. We therefore want to provide novel data on patients who are diagnosed with pancreatic cancer, as well as those who possess risk factors associated with the development of this malignant condition.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
