

## Special Issue

# Pancreatic Cancer: Novel Strategies of Diagnosis and Treatment

### Message from the Guest Editors

Pancreatic cancer is widely recognized as a highly aggressive form of cancer, exhibiting a 5-year survival rate of approximately 10%. The unfavorable prognosis primarily stems from delayed diagnosis during therapeutically advanced stages, as well as the poor success rate of oncological treatments. To date, a number of proteomic biomarkers, free-cell DNA, and microRNA have exhibited encouraging outcomes. The connection between molecular marker values and clinical characteristics could help find biomarkers that can effectively identify people who are more likely to suffer from pancreatic cancer. This would enable the application of screening strategies in these groups. The primary focus of this Special Issue is to increase the clinical focus on the pathogenesis of pancreatic cancer in order to achieve progress in innovative diagnostic and treatment strategies. We therefore want to provide novel data on patients who are diagnosed with pancreatic cancer, as well as those who possess risk factors associated with the development of this malignant condition.

### Guest Editors

Dr. Camelia Cristina Diaconu

1. Faculty of Medicine, University of Medicine and Pharmacy Carol Davila Bucharest, 050474 Bucharest, Romania
2. Department of Internal Medicine, Clinical Emergency Hospital of Bucharest, 105402 Bucharest, Romania
3. Academy of Romanian Scientists, 050085 Bucharest, Romania

Dr. Gina Gheorghe

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
