

Special Issue

Clinical Advances in Melanoma

Message from the Guest Editors

There has been rapid developments in melanoma science and modern immunotherapeutics in an effort to achieve the gold standard of precise, patient-tailored therapy to improve clinical outcomes and minimize toxicities associated with systemic checkpoint blockades. This Special Issue aims to provide an update for practicing clinicians with a comprehensive collection of articles and reviews. To this end, we would like to invite original research in this area as well as state-of-the-art reviews, including reviews of emerging technologies and therapeutics, to be considered for inclusion in this issue. Examples include novel assays in development for biomarker assessment, evolving changes in relation to therapeutic timing and strategy, the best surgical practices, the role of regional therapies in melanoma, special considerations in unique populations This Special Issue aims to present the most recent advances in the field of precision immunotherapy and their implications in the future care of melanoma patients. We look forward to your submission!

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
