Breast Reconstruction: Clinical Updates and Perspectives

Message from the Guest Editor

Breast reconstruction represents an exciting field of plastic surgery innovation, with a critical role in patient well-being. Microsurgical reconstruction of the breast has become a routine procedure in most hospitals, proving to be time and cost-effective. Attention has been placed on limiting donor site morbidity and enhancing the aesthetic appearance of the breast, eventually combining multiple flaps to achieve the ideal volume and desired shape. In the case of breast cancer-related lymphedema, the combination of lymph node flaps with breast flaps has further pushed the level of reconstruction towards complete anatomical restoration. Advancements have followed on the oncologic side, with increased quality of nipple-sparing mastectomies in the constant search for a natural aspect of the reconstructive breast. This Special Issue of the highly impacted *Journal of Clinical Medicine*, “*Breast Reconstruction: Clinical Updates and Perspectives*” wants to give not only an update on the latest techniques but also critically analyze their effectiveness and complications, to guide the plastic surgeon for the best possible decision making in breast reconstruction.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
