New Advances in COVID-19 and Pregnancy

Message from the Guest Editor

Global preparedness frameworks continue to overlook risks to pregnant women and babies during epidemics. Based on what is known at this time, pregnant women are at an increased risk of severe illness from COVID-19 compared to nonpregnant women. Additionally, pregnant women with COVID-19 might have an increased risk of adverse pregnancy outcomes. Therefore, there is a need to investigate the effects of coronavirus disease 2019 (COVID-19) on mortality of pregnant and postpartum women. The aim of this Special Issue is to present papers summarizing well-established data on the clinical manifestation of COVID-19 in pregnant women, maternal and perinatal outcomes associated with COVID-19, the risk of vertical transmission of the virus, and the effect of SARS-COV-2 infection during pregnancy on fetal and neonatal outcomes. The data provided by the papers included in this Special Issue will allow researchers to determine maternal, fetal, and neonatal risk associated with SARS-COV-2 infection during pregnancy and may help to provide evidenced-based and personalized recommendations for the care of pregnant women with COVID-19.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
