Critical Care Medicine: Innovation and Long-Term Patient Outcomes

Message from the Guest Editor

Critical care medicine faces a dual imperative: to integrate accelerating technological innovation while preserving patient-centred, value-aligned care. Questions surrounding appropriateness of intervention, long-term outcomes, equity of access, and sustainability are becoming as central as physiological stabilisation. This Special Issue aims to present and disseminate recent advances related to innovation, decision-making, and patient-centred outcomes in critical care medicine. We welcome contributions addressing emerging technologies, models of care delivery, ethical frameworks, and strategies that improve both clinical and experiential outcomes for critically ill patients and their families. This Special Issue seeks to bring together diverse perspectives that advance both the science and the humanity of critical care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
