Ocular Surface Disease: Epidemiology, Diagnosis and Management

Message from the Guest Editors

Researchers, scientists, and eye care professionals are invited to submit their latest work for publication in our upcoming Issue on Ocular Surface Disease: Epidemiology, Diagnosis and Management. Ocular surface health plays a critical role in maintaining normal vision and may be affected by several disease processes, often requiring a multifaceted treatment approach. Ocular surface diseases, such as dry eye disease, have been the focus of extensive research in recent years, leading to significant advances in our understanding. The objective of this Special Issue is to summarize the latest research covering the risk factors, prevalence, diagnosis, and treatment of ocular surface diseases. We welcome original articles as well as reviews providing fresh insights into the risk factors, development, diagnosis, and treatment of these disorders. We look forward to receiving your valuable contribution to this Special Issue.

Guest Editors

Dr. Sandeep K. Dhallu

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
