Testicular Cancer: Clinical Advances in Diagnosis and Treatment

Message from the Guest Editors

Testicular cancer, though rare, remains the most common malignancy in young men. Over the past few decades, significant strides have been made in its diagnosis, treatment, and overall management, leading to remarkable survival rates. However, challenges persist in optimizing diagnostic techniques and algorithms, personalizing treatment protocols, and minimizing the long-term side effects. This Special Issue, titled “*Testicular Cancer: Clinical Advances in Diagnosis and Treatment*”, gathers leading research and clinical insights from multiple disciplines, including oncology, urology, radiology, and/or reproductive medicine. Although radiology plays a pivotal role in the diagnosis and management of testicular cancer, with advanced imaging techniques being essential for both staging and guiding treatment decisions, this issue explores the latest advancements in early detection, imaging technologies, surgical innovations, and novel therapeutic approaches. Through a multidisciplinary lens, we aim to offer a comprehensive overview of the current state of testicular cancer care, highlighting both successes and areas where further progress is needed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
