

Special Issue

Advances in Epidemiological and Statistical Methods for Clinical Research

Message from the Guest Editors

Our Special Issue, entitled “Advances in Epidemiological and Statistical Methods for Clinical Research”, will focus on presenting the latest advancements in epidemiological and statistical methodologies tailored for clinical research. We encourage all authors to submit articles related to a wide range of methodologies, including novel study designs, advanced statistical techniques, causal inference methods, meta-analysis and systematic review methods, strategies for addressing bias and confounding in observational studies, the development and validation of prediction models, and methodological challenges and solutions in specific areas of clinical research. Articles will be considered for publication in this Special Issue only if they are relevant to our clinical research. Contributions will be part of an ongoing dialogue on methodological advances in clinical research and facilitate the translation of research findings into improved outcomes for patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
