

## Special Issue

# New Advances in Nasopharyngeal and Oropharyngeal Cancer Treatment

### Message from the Guest Editor

Oropharyngeal and nasopharyngeal carcinomas represent a significant therapeutic challenge for head and neck surgeons and oncologists. Unlike most head and neck tumors, which are typically solely linked to traditional risk factors such as smoking and alcohol consumption, these two tumor types may also be associated with the oncogenic activity of viruses, namely EBV and HPV. This can have significant prognostic and therapeutic implications. Another factor that complicates the treatment of these tumors is their location and the difficulty in identifying the primary tumor, especially when they arise as small microtumors in the Waldeyer's ring, where it can be very challenging to distinguish between flogistic and neoplastic activity. Consequently, these tumors may often be misclassified as neck metastases from an occult tumor, as the primary tumor cannot always be identified. This Special Issue aims to highlight the therapeutic advances made in the treatment of these insidious head and neck tumors to ensure the best possible care for patients.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
