Cerebral Palsy: Recent Advances in Clinical Management

Message from the Guest Editors

The care of individuals with cerebral palsy (CP) continues to advance rapidly, from making the diagnosis and identifying etiology to the implementation of innovative assessment tools and interventions. In this Special Issue, titled “Cerebral Palsy: Recent Advances in Clinical Management”, we invite authors to submit papers on topics related to original works in the clinical care of individuals with CP, including care of their comorbid conditions. Focus may be on novel processes or the evaluation of established practices that strengthen the evidence for their use. Systematic reviews are welcome. Often, even when guidance is available to drive best practices, implementation can lag. Thus, this Special Issue also considers submissions incorporating implementation science. We look forward to receiving your work and disseminating it as we collectively advance the clinical management of individuals with CP.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
