Clinical Advances in Bariatric Surgery

Message from the Guest Editor

Bariatric surgery has been acknowledged as a treatment method for morbid obesity for several decades, and various techniques have been continually developed. It is the only method that allows for long-term, lasting weight loss and remission of comorbidities. Techniques vary from more invasive reconstructions of the gastrointestinal tract, such as classic biliopancreatic diversion or novel single anastomosis sleeve-ileum bypass, to less invasive methods, such as sleeve gastrectomy, or even endoscopic procedures, such as gastric plication. The science behind how bariatric surgery affects weight loss is also evolving, with evidence showing that the mechanism behind it is not only affected by food restriction or malabsorption, but also by hormonal changes. The indications for weight loss surgery have also changed over the years, with the most recent guidelines of the IFSO making them even wider. The pace at which this particular field of medicine is developing is astounding, and clinical advances in bariatric surgery can be observed every day. In this Special Issue, we welcome papers which show how bariatric surgery is changing today.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
