

Special Issue

Clinical Investigations into Diagnosing and Managing Strabismus

Message from the Guest Editors

The diagnosis and treatment of strabismus have been key areas of clinical research due to their significant impact on patients' quality of life. This Special Issue focuses on recent advancements in the field, emphasizing the use of new diagnostic and therapeutic technologies that aim to improve precision and efficacy in managing this condition. Topics include innovative diagnostic methods, ranging from advanced imaging techniques to portable devices, as well as therapeutic approaches, such as AI-assisted surgery and digital tools for visual rehabilitation. Submissions are encouraged that explore these areas, particularly those integrating emerging technologies, such as machine learning, augmented reality, and telemedicine. This issue aims to gather contributions highlighting how these technologies can optimize clinical outcomes and enhance understanding of the pathophysiology of strabismus.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
