New Insights into Infectious Skin and Mucosal Diseases

Message from the Guest Editors

Infections of the skin and mucous membranes are widespread in clinical practice, as primary infections from viruses and bacteria as well as the reactivation of latent viruses are responsible for multiple clinical pictures in Dermatology and Venereology. With regard to the viral etiology, the same virus may result in distinct clinical manifestations and a single disease may be caused by different viruses. Changes in the epidemiology, virulence and contagiousness of several pathogens have emerged in recent years. Both new pathogens (such as Sars-CoV-2) and old pathogens (monkeypox virus) may result in new cutaneous manifestations involving the skin and mucous membranes. In this Special Issue, we would like to collect novel insights into the field of skin and mucosal infections that provide a clinical, epidemiological, and therapeutical perspective. Preventive approaches to skin/mucosal infections through vaccinations may also be discussed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
