Special Issue

State of the Art in Invasive Vascular Interventions (Second Edition)

Message from the Guest Editors

Endovascular techniques can now be used in practically any location on the body (from the top of the head to the little toe). Some endovascular therapies are specifically designed to treat arterial disease, while others are specifically designed to treat venous disease. In the case of vascular procedures, percutaneous transluminal angioplasty (PTA) and stenting are the two most commonly performed methods. However, to date, there are still some disease types, such as chronic pulmonary hypertension, where long-term results of PTA are yet to be seen. Yet new devices have been developed in recent years. One such device is the Shockwave, which is specifically designed to treat calcified stenoses/occlusions. However, like many other new devices, we need more conclusive results on the outcomes of interventions that utilize Shockwave. Following the success of the First Edition of "State of the Art in Invasive Vascular Interventions", the Second Edition of this Special Issue is announced here to continue to welcome authors to submit papers on the clinical relevance and short- and long-term outcomes of rarely performed invasive vascular therapies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
