Special Issue

Clinical Diagnostics and Therapeutic Advances in Pregnancy Complications

Message from the Guest Editors

The landscape of pregnancy complications is rapidly evolving through advancements in diagnostics and therapeutics. Maternal and fetal health remains a priority in obstetrics, and ongoing research is making it possible to detect risks earlier and with greater accuracy and to implement more effective treatment plans for conditions such as pre-eclampsia, gestational diabetes, preterm labor, and fetal growth restriction. Advances in noninvasive testing and biomarkers have made the early detection of complications more feasible and accurate. Techniques such as ultrasound imaging, Doppler flow studies, and the development of blood and urine tests allow healthcare providers to monitor both maternal and fetal well-being with greater precision. The application of advanced genetic screening and sequencing technologies is making it easier to identify genetic anomalies, particularly in fetuses with structural malformations. In both prevention and treatment, lowdose aspirin use to prevent pre-eclampsia and gestational hypertension stands out as one of the most significant breakthroughs in recent obstetric care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
