Challenges and Future Trends in Bariatric Surgery

Message from the Guest Editors

Metabolic and bariatric surgery (MBS) is regarded as the most effective and durable therapeutic intervention for patients with obesity. The complexity of obesity as a chronic disease requires a comprehensive knowledge of all the available and feasible therapeutic options. Sleeve Gastrectomy (SG) and Roux-en-Y Gastric Bypass (RYGB) are the most common interventions, but new surgical procedures are spreading worldwide with different outcomes in terms of weight loss and remission of obesity-related medical conditions. The aim of this Special Issue is to report the role of methodology and the urge to develop GRADE-based guidelines, as well as the range of complications and long-term impact of MBS over time after new bariatric procedures such as one anastomosis gastric bypass, a single anastomosis sleeve-ileal bypass, or a single anastomosis duodeno-ileal bypass.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
