Advances in New Clinical Perspectives on Chronic Kidney Disease

Message from the Guest Editors

Chronic kidney disease affects over 10% of the world's population. Decreased kidney function leads to a significant increase in cardiovascular risk and all-cause mortality. It is estimated that by 2040, chronic kidney disease will become the fifth leading cause of death worldwide. Therefore, any research that improves detection and diagnostic accuracy, shortens diagnostic time, enhances the quality of monitoring and slows the progression of CKD can contribute to improved health outcomes and reduced mortality. The aim of this Special Issue is to present new perspectives that have emerged in recent years in the detection, diagnosis, treatment and monitoring of chronic kidney disease, as well as the interaction between the kidney and other organs leading to CKD. Research articles and reviews are particularly welcome. Areas of research should broadly encompass various etiologies of chronic kidney disease with identified organ interactions, in light of new discoveries and prospects for further research. We are pleased to invite you to participate in this Special Issue of the *Journal of Clinical Medicine* on new clinical perspectives on chronic kidney disease.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
