Focus on Multiple Myeloma: Diagnosis, Therapy and Clinical Outcome

Message from the Guest Editor

Multiple myeloma (MM) is a complex hematological malignancy defined by abnormal plasma cell proliferation. Over the past decade, significant advances have been made in its diagnosis, diagnostic innovations, and treatment. Prognosis and clinical outcome have improved substantially over the past two decades. Cytogenetic risk factors, depth of response, and minimal residual disease (MRD) status remain critical prognostic indicators. While these advances have improved patient outcomes, ongoing research focuses on relapsed/refractory MM (RRMM): exploring novel therapies (CAR T-cell, BiTE), deciphering resistance mechanisms, testing non-immune options, and optimizing combination therapies to balance efficacy and safety. Moreover, ongoing research focuses on early detection, individualized therapy, and innovative therapeutic options towards a functional cure. This Special Issue compiles cutting-edge research on MM progress, challenges, and future directions, welcoming submissions on advances in diagnosis, therapy, and its transition towards an improved clinical outcome and prognosis. We are looking forward to your submissions.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
