New Advances and Clinical Outcomes of Pediatric Endocrinology

Message from the Guest Editor

Recent developments in pediatric endocrinology have significantly advanced the diagnosis and management of endocrine disorders in children. Innovations in genetic testing and molecular diagnostics have enabled earlier and more accurate identification of conditions such as congenital hypothyroidism, growth hormone deficiency, and disorders of sex development. These tools have facilitated the implementation of individualized treatment strategies, improving both short- and long-term clinical outcomes. Advancements in hormone replacement therapies and delivery systems have enhanced disease control and quality of life for patients with chronic endocrine disorders, including adrenal insufficiency and growth hormone deficiency. Additionally, targeted therapies are emerging as effective options for rare and complex conditions, such as genetic bone disorders. The management of endocrine sequelae in childhood cancer survivors has underscored the importance of multidisciplinary care models. Collaboration among pediatric endocrinologists, oncologists, and mental health professionals is essential to address the late effects of cancer treatment and optimize long-term health.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
