

## Special Issue

# New Insights into Tinnitus Heterogeneity

### Message from the Guest Editors

Tinnitus is a multimodal phenomenon. It includes pathophysiological processes in the area of peripheral and central hearing, associative processing in central networks of the brain, and cognitive processes. Questions about the appropriate form of therapy, biological markers or the genetics of tinnitus distress are the focus of current research, and numerous studies have already proved that impairments in chronic tinnitus are often accompanied by a variety of psychosomatic causes and comorbidities. This Special Issue aims to summarize and classify important work on this subject.

We are looking forward to your contributions on tinnitus heterogeneity as expressed in individual pathophysiology, medical and audiological influencing factors as well as psychological aspects of experiencing chronic tinnitus, diagnostic aspects and therapy in order to use these results to sustainably increase the quality of life of those affected. severity of tinnitus

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
