Cancer Prevention and Early Detection: Epidemiological Approaches and Public Health Strategies

Message from the Guest Editors

Cancer remains a major public health challenge, with an estimated 18,741,966 new cases reported worldwide in 2022. Projections indicate an increase ranging from 106.7% in Africa to 20.5% in Europe. Consequently, cancer prevention and control have become strategic priorities for governments, healthcare professionals, and researchers. A better understanding of the cancer burden and its associated risk factors, advances in early diagnostic technologies, optimized therapeutic approaches, and equitable access to healthcare services are essential to improving cancer prevention and control. For this Special Issue, we invite authors to submit papers focusing on cancer information systems for planning and evaluation, innovations in screening programs, therapeutic advancements, and analyses of disparities in healthcare access.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
