Current Status of Endovascular Therapy for Acute Ischemic Stroke—2nd Edition

Message from the Guest Editor

Endovascular therapy (EVT) is now broadly recognized as one of the most powerful treatments for acute stroke caused by large-vessel occlusions. Recent advancements in acute ischemic stroke management via EVT have led to significant reductions in morbidity and mortality rates in selected patients with large-vessel occlusions. Despite these developments, post-stroke disability remains pervasive and further studies are needed in order to establish the role of EVT in posterior circulation and distal-vessel occlusions, with the need for the development of new and effective techniques for the revascularization of small vessels. Many of these questions are the subject of current or upcoming clinical trials. This Special Issue aims to gather up-to-date publications regarding endovascular therapy for ischemic stroke and updates in pre-, peri-, and post-procedural management. This information will help improve acute stroke management and provide new perspectives on current clinical practice. We are looking forward to your contributions to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
