Recurrent Pregnancy Loss (RPL): Clinical Presentations, Diagnosis, and Management

Message from the Guest Editor

Recurrent pregnancy loss (RPL) has become a central subject at the forefront of the clinical and research stages in the fields of obstetrics, gynecology, and fertility. Current guidelines have been published in recent years, including by ESHRE, Israel, and more. As we deepen the knowledge and research on the subject, we will be able to offer innovative evidence-based treatments and thus allow more couples to become parents and/or have more children. Active research collaborations between medical centers and the increase in multicenter retrospective research are key points in understanding the mechanisms that cause RPL and, at the same time, for the development of innovative treatments. Aspects related to the genetic component, immunological treatments, congenital hypercoagulability, endoscopy, and emotional as well as mental support are only some of the issues that medicine focuses on in couples with RPL.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
