

Special Issue

Management of Crohn's Disease and Ulcerative Colitis

Message from the Guest Editors

We are delighted to invite researchers and experts to submit their research papers for consideration in our upcoming Special Issue, entitled "Management of Crohn's Disease and Ulcerative Colitis". Inflammatory bowel diseases (IBD), including Crohn's disease and ulcerative colitis, are chronic conditions that can greatly impact a patient's quality of life. Despite significant advances in understanding the underlying pathogenesis of IBD and the development of new treatment options, there remains a need for further research to optimize management strategies for these debilitating conditions. In this Special Issue, we invite researchers to submit original research, systematic reviews, meta-analyses, and clinical trials that focus on improving the management of Crohn's disease and ulcerative colitis. Topics of interest include, but are not limited to, new therapeutics, biomarkers, diagnostic tools, and novel treatment strategies. We also encourage submissions that focus on understanding the underlying mechanisms of IBD, as well as research into the impact of IBD on patient-reported outcomes and health-related quality of life.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
