

Special Issue

Moving Forward to New Trends in Pulmonary Diseases

Message from the Guest Editors

This Special Issue aims to showcase cutting-edge research and emerging trends in the diagnosis, treatment, and management of various pulmonary diseases, including tuberculosis, chronic obstructive pulmonary disease, interstitial lung disease, bronchiectasis, lung cancer, and sleep apnea. Despite recent advances, many challenges persist, such as early detection, drug resistance, and optimizing individualized treatment strategies. Tuberculosis, in particular, remains a global public health priority, with drug-resistant strains posing significant diagnostic and therapeutic hurdles. To address these core problems, we encourage submissions that explore novel diagnostic methods, multidisciplinary therapeutic approaches, and innovative rehabilitation techniques tailored to meet patient-specific needs. This Special Issue aims to mobilize collaborative efforts that foster a deeper understanding of pulmonary pathophysiology, thereby paving the way for improved patient outcomes and more effective, personalized care strategies in respiratory medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
