Cardiovascular and Cerebrovascular Emergencies: Advances in Clinical Research

Message from the Guest Editor

Cardiovascular and neurovascular emergencies are some of the most catastrophic and time-sensitive diseases. However, therein lies exciting opportunities to improve clinical outcomes. This Special Issue of the *Journal of Clinical Medicine* focuses the readers' attention on emerging topics on the diagnosis, risk stratification, prognostication, and treatment of cardiovascular and neurovascular emergencies. Of particular interest is the inclusion of multidisciplinary studies that involve the interaction of the heart and brain. This Special Issue will be an invaluable resource for emergency physicians, intensivists, cardiologists, and scientists working in this space, providing cutting-edge reports ranging from early exploratory studies that stimulate further research to practical guidance for clinicians. The high-quality content, provided by internationally renowned experts from various institutions, will make this Special Issue a must-read for anyone interested in this field.
