New Insights into Melanoma and Non-Melanoma Skin Cancers

Message from the Guest Editor

The concerning increase in melanoma and non-melanoma skin cancers (NMSCs) requires a renewed focus on early detection and personalized treatment strategies. Recent advances in diagnostics, including state-of-the-art imaging and genetic profiling, have revolutionized our ability to detect and intervene at the earliest stages, improving prognosis and treatment success. The therapeutic landscape is equally dynamic, with the emergence of immunotherapy and targeted therapies tailored to individual genetic and immunological profiles. This paradigm shift holds significant potential to improve efficacy while minimizing side effects, offering a more precise and patient-centric approach. Beyond early detection and targeted therapies, ensuring equitable access to care and promoting patient education and empowerment are essential. Telemedicine holds great promise for improving accessibility, facilitating timely interventions, and engaging patients. Additionally, artificial intelligence offers exciting opportunities to refine diagnostics and treatment planning, further personalizing care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
