Deep Vein Thrombosis and Pulmonary Embolism: Clinical Treatment and Management—Second Edition

Message from the Guest Editor

Deep vein thrombosis (DVT) and pulmonary embolism (PE) continue to be significant medical challenges, with increasing implications in terms of hospitalizations and morbidity. These conditions affect a substantial number of patients worldwide, and their consequences can be devastating if not adequately addressed. In this context, our Special Issue focuses on providing an updated and comprehensive insight into the clinical management and treatment of DVT and PE. We invite contributions that address a wide range of topics, including the management of DVT, the use of systemic thrombolytic therapies, catheter-directed pulmonary reperfusion, mechanical thrombectomy for DVT, surgical embolectomy and extracorporeal embolectomy. We also explore bleeding risk assessment and management, right ventricular function, outpatient treatment of low-risk PE and/or DVT, and long-term management, encompassing anticoagulation, screening and the treatment of complications. Furthermore, we delve into the relationship between venous thrombosis and cancer, as well as complications associated with COVID-19-related venous thrombosis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
