## **Special Issue**

## Cardiovascular Computed Tomography in Clinical Practice

### Message from the Guest Editors

During the last 20 years, cardiac computed tomography (CCT) has emerged as a technique that can provide crucial diagnostic and prognostic information in different clinical scenarios. CCT is now recommended by the international scientific society as a key tool in patients with acute and chronic coronary artery disease (CAD). Moreover, recent developments such as the study of myocardial perfusion and fractional flow reserve have transformed CCT into a one-stop test able to offer all the anatomical and functional information to guide the management of patients with CAD. Finally, there is increasing evidence that CCT can be used for tissue characterization with remarkable clinical value, including the assessment of ischemic and non-ischemic cardiomyopathies.

This Special Issue aims to discuss the potential and challenges of new and established clinical applications of cardiovascular CT.

- cardiac computed tomography (CCT)
- coronary artery disease
- structural heart disease
- congenital heart disease
- atherosclerosis
- plaque composition
- pericoronary fat inflammation
- ischemic and non-ischemic cardiomyopathies

### **About the Journal**

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
